### Flagship Solutions Group Earns Prestigious IBM Dynamic Infrastructure Specialty Accreditation

Flagship Solutions Group has just received accreditation as an IBM Dynamic Infrastructure Specialty Business Partner. This industry-recognized certification is only awarded to companies with the ability to lead Dynamic Infrastructure opportunities in large complex installations.

IBM Dynamic Infrastructure is focused on three client comparatives: how to help clients improve service, reduce cost, and manage risk. It's also all about how to help clients thrive in today's business climate, a business climate that requires you to be much more agile and faster than ever before.

IBM's Dynamic Infrastructure solutions interconnect your business assets, your mobility infrastructure, and your production line — and all of these things are becoming smarter, more interconnected, and more intelligent. Learn how Flagship can put IBM Dynamic Infrastructure solutions to use for you. Contact Flagship Solutions Group at 561-289-2045 or [click here](#) to email our Sales team.

### Upcoming Events

Join Flagship Solutions Group, Marathon Technologies and IBM for dinner at the Hard Rock Hotel & Casino on Thursday, September 24th 2009, starting at 6:00 PM.

This is an exclusive invitation to a dinner seminar on Internet Security Systems and Data Protection. You'll learn how you can achieve world class Internet Security Solutions and how to prevent business interruptions — instead of merely planning for recovery when a failure occurs. Attending the dinner is free, although Flagship is not responsible for any gambling losses you may incur on your own after the event. [Click here](#) to register.

Flagship Solutions Group is proud to be a Platinum Sponsor of the SFLHIMSS first annual **Technical Symposium and Educational Event** at the Signature Grand in Davie, Florida on October 15, 2009. In this exciting and critical time for healthcare information, the South Florida healthcare technology community is coming together to present solutions on the latest issues affecting your business.

Panel discussions will include Interoperability, Compliance, Personal Health Records, Meaningful Uses, Knowledge Management, Informatics, and much more. Special Guest Keynote Speaker Alexander (Alex) I. Veletsos, Chief Technology Officer at Orlando Health, will discuss "Achieving Highly Available Clinical & Financial Systems."

## **IBM Internet Security Systems Wins NSS Labs Gold Certification**

The IBM Internet Security Systems (ISS) Proventia GX6116 Network Intrusion Prevention System (IPS) has received the NSS Labs Gold Certification for the second consecutive quarter.

NSS Labs is the world's foremost independent product analysis and certification organization. Many of the industry's leading IPS solutions took part in the most recent test, and the Proventia GX6116 was the only "repeat winner" of the Gold Certification. As part of the test, the Proventia GX6116 scored a perfect 100% effectiveness during the three-month testing period.

The Proventia Network IPS product line is based on unique preemptive protection technology backed by IBM's world-leading X-Force research and development team. The proactive, behavioral research and multilayered security technologies developed by the X-Force include the proprietary Protocol Analysis Module and patented Virtual Patch™ preemptive protection. This unique combination of detection and blocking techniques keeps IBM ISS clients ahead of the evolving security threats, as proven by the 100% effectiveness rating in the NSS Labs test.

For more information about IBM's Proventia and how to protect your organization against today's evolving threats, contact Flagship at 561-289-2045 or [click here](#) to email the Flagship sales team.

## **Citrix Announces End Of Promotion Pricing**

On August 28, 2009, Citrix Systems, Inc. announced the expiration of the XenDesktop Standard Edition and Advanced Edition promotions.

Citrix XenDesktop is a desktop virtualization solution that centralizes and delivers desktops as a service to users anywhere, reduces desktop TCO up to 40 percent, and improves data security by centralizing desktop lifecycle management in the datacenter. It delivers a high definition user experience over any connection including high latency wide area networks. The open architecture of XenDesktop offers choice and flexibility of virtualization platforms and end points. Unlike other desktop virtualization alternatives, it simplifies desktop management by using a single image to deliver personalized desktops to users anywhere and enables IT to manage service levels with built-in desktop performance monitoring.

- End of Sale of XenDesktop Advanced Edition Promotion is effective September 30th, 2009
- End of Sale of XenDesktop Standard Edition Promotion is effective September 30th, 2009

You still have time to take advantage of these promotions, but time is running out. Contact Flagship Solutions Group at 561-289-2045 or [click here](#) to email us.

## Details on Safe House for First Family Leaked Via P2P

Details about a US Secret Service safe house for the first family — to be used in the event of a national emergency — were found to have been leaked to a LimeWire file-sharing network recently. This adds another incident to the growing amount of evidence about the dangers of peer-to-peer (P2P) networks.

The data on the nuclear sites was found on computers associated with four IP addresses in France, though it is not immediately clear where the data came from. The files containing information about the president had President Obama's seal on it and a July date. Although the information was not classified, it was sensitive enough that under normal circumstances it would not have been available even with a Freedom of Information Act request.

The disclosure prompted the House Oversight and Government Reform Committee Chairman to call for a ban on the use of P2P software on all government and contractor computers and networks.

***YOUR business could be next to face public humiliation and headache.*** For more information about the only dedicated tool available to control P2P traffic and keep your network healthy and fit, contact Flagship Solutions Group at 561-289-2045 or [click here](#) to email us.
